

The BOLD® Transmission app lets you put a virtual BOLD structure in your backyard, along an existing right of way, in a conference room... anywhere you'd like.

To Get Started

Install the BOLD Transmission App for your device from the Android Google Play or Apple App Stores.

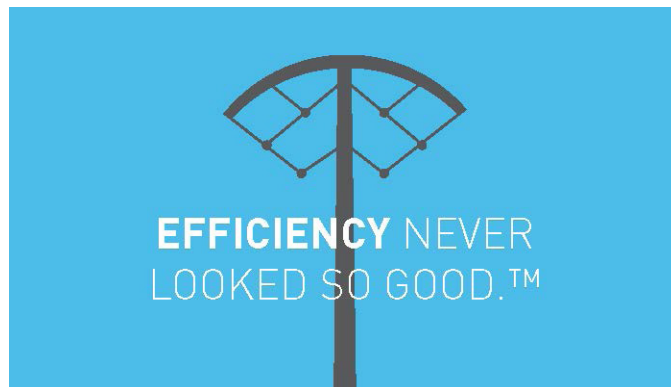

How to Use the App

1. Open the app.
2. Place a BOLD card or the image below where you want the base of the structure to be anchored. The "back" of the card showing the BOLD structure and "Efficiency never looked so good™" should be facing you.

3. Line up the blue rectangle of the card within the dotted lines of the BOLD app capture screen.
4. Once the BOLD structure appears, you can swipe to rotate, pinch to scale the model, or tap the button at the bottom center of the screen to swap the model.

For information about BOLD, click the "More Info" icon on the screen.

Please contact info@boldtransmission.com with questions about BOLD or the app.

Align the image above inside the dotted lines of the capture screen.
